🌐 LANGUAGES

- English: Duolingo English Test
- French
- Arabic
- Deutsch: A1

★ SOFT SKILLS

Communication, Leadership, Time Management, Teamwork, Adaptability, Problem-Solving

🧠 TECHNICAL SKILLS

Programming Languages:
Java, Python, C, C#, JavaScript, SQL, PHP, HTML/CSS

Frameworks & Libraries:
Spring Boot, FastAPI, Django, .NET, React.js, OpenCV, Selenium, Hugging Face Transformers, TypeScript

Databases & Cloud:
MySQL, Oracle, AWS, PostgreSQL, pgvector

Tools & Platforms:
Git, GitHub, Docker, Linux, VS Code, IntelliJ, Postman, Jupyter Notebook, Visual Studio

Concepts & Methodologies:
Object-Oriented Design, Data Structures, Algorithms, RESTful APIs, Scrum, CI/CD, Kanban, System Design, ScrumBan, Data Pipelines, Web Scraping, CRISP-DM

AI & Machine Learning:
LLMs (Ollama, Qwen), RAG Systems, Embeddings (sentence-transformers), NLP (spaCy), Sentiment Analysis, Agentic AI

📜 CERTIFICATES

Python for Data Science, AI & Development
IBM

Scrum Fundamentals Certificates

🏠 ORGANISATIONS

IEEE Volunteer
01/2024 – Present

- IEEE Computer Society Region 8, Social Media Coordinator
- IEEE Computer Society AI Caravan - Tunisia, Lead

AIIESEC, Outgoing Global Volunteering Member
2023 – 2025

🎓 EDUCATION

High School Diploma in Technological Sciences,
LYCEE NOVEMBER 1955
2022 – 2023

Bachelor In Computer Science,
INTERNATIONAL INSTITUTE OF TECHNOLOGY: IIT
09/2023 – 07/2026 | Sfax, Tunisia

🏢 INTERNSHIPS

AI Software Engineering Intern — Full-Stack & Intelligent Content Automation System, ADVISING LTD
01/2026 – 07/2026 | Remote

- Built a **full-stack system (FastAPI backend + React frontend)** for managing content creation, approval workflows, and scheduling
- Designed and implemented a **RAG-based AI system using pgvector embeddings** for context-aware content generation
- Integrated **local LLM (Ollama + Qwen model)** for AI content generation with prompt engineering strategies
- Developed an **automated workflow engine (Draft → Review → Approved → Scheduled → Published)** using state machine architecture
- Implemented **content analytics pipeline (Python + NLP models)** for sentiment analysis, topic classification, and performance insights
- Built **multi-platform publishing system** (WordPress, LinkedIn, Facebook, etc.)
- Designed a **data pipeline for scraping, cleaning, deduplication, and embedding storage**
- Developed **role-based access control (RBAC)** with secure authentication (JWT + FastAPI security concepts depending on implementation)
- Integrated **automation workflows using Celery task queues**
- Created **analytics dashboards for engagement tracking and content performance evaluation**

Software Development Intern, CliniSys ERP
07/2025 – 07/2025 | Hybrid, Sfax

- Engineered pharmacy inventory system with Spring Boot backend and React.js frontend
- Designed RESTful APIs using OOP principles for medicine management and stock tracking
- Optimized MySQL performance with indexed queries, reducing data latency by 20%
- Implemented secure CRUD operations with input validation and error handling

Web Development Intern, International Institute of Technology:IIT
07/2024 – 09/2024 | Sfax, Tunisia

- Developed web interfaces using HTML/CSS/JavaScript, improving accessibility by 25%
- Contributed to Django backend development following MVC architecture
- Enhanced code efficiency through optimization techniques and peer reviews

📁 PROJECTS

Task Management System | Java, Spring Boot, MySQL, React
2025

- Built full-stack application with RESTful APIs following microservices principles
- Applied OOP design patterns for modular, testable backend architecture
- Optimized database with indexing, improving query performance by 30%

E-Learning Platform | C# (.NET), SQL Server, Bootstrap
2025

- Developed scalable .NET application with MVC architecture and role-based access
- Designed relational database schema for course management and user tracking
- Implemented responsive UI with Bootstrap and efficient search algorithms
